No

REFERENCE (CLIENT)

Oscar Brown, Supervisor of Operations and Transportation

The Millington Municipal School District needed several updates to modernize the existing campus. Fleming Architects worked with the High School to create a Master Plan for the proposed renovations. The initial phase included a new building that contained new classroom spaces, science labs, a new library and a new cafeteria. The second phase will consist of a new building that will house the Vo-Tech program, which includes an auto shop, small engine repair classroom, cosmetology classroom, family life program, and computer and I.T. Tech spaces. The third and final phase will be the fine arts building, which will include choir rooms, band rooms, an auditorium, technology studio and administrative areas. Phase 1 has been completed and the remaining two phases are waiting for funding.

During the demolition phase, the basement of an existing school was found underground and had to be excavated before construction could commence.
